Index 2 measures student growth in like assessments from one year to the next. Index 3 measures student's success from socio-economic groups and the two lowest sub-groups. Index 4 measures graduation rates and college readiness.

It is from the hard work and dedication of the teachers and staff of Brady ISD that these scores were made possible. The success of our students is solely due to the relentless efforts to strive to surpass expectations not only on state assessments but each and every day in the classroom. A huge thank you goes out to all of those who had a part in this success.
